Technology Solutions Wins Yet Another Award For World-Class Customer Service

Leader in Unified Communications Wins Big

LIVONIA, MI — May 26, 2015 — Technology Solutions, a leader in unified communications, announced today that the company has been presented with yet another series of awards, including the Triple Crown Award for Superior Overall Performance and the Recognition of Outstanding Commitment to Corporate Training Award. The awards were presented on behalf of Technology Assurance Group (TAG), at their annual convention in Savannah, Georgia. TAG is an international association of independent unified communication providers representing approximately \$350 million in products and services. This prestigious event gathers the best and brightest minds in corporate technology industry to discuss best practices, the future of technology and to recognize the leaders of the industry for innovation in the past year. Both awards were presented to Steve Futrell, President of Technology Solutions LLC at the national convention.

“We’re always pleased to be recognized for our efforts,” stated Futrell. “Most businesses see the Triple Crown Award as the big prize because it signifies a very healthy organization, strong

financial performance and leadership in our marketplace. However, we’re most proud of the Outstanding Commitment to Corporate Training Award. We’ve spent years fostering a company culture that’s focused on personal and professional development, and our unrelenting commitment to employee growth is what contributes to all of the other awards.” Futrell clearly recognizes the value of ongoing education, training and growth in his organization and regularly invests significantly in employee development.

“I feel so privileged to work with such an incredible team,” added Futrell. “Our team operates differently than other organizations. We set the bar high for our employees but each and every single team member takes individual ownership of our bottom-line results. It’s such a rarity to be surrounded with individuals who embrace accountability and embody excellence in all that they do. This is a very special organization that I am incredibly proud to be a part of and the relationships we’ve built with clients are testaments to the extra effort that our team puts into every technology deployment.”

Technology Solutions LLC is clearly a company geared for the future. Technology is one such

industry that is under constant flux and business owners need a partner who is proactively educating itself on the latest advancements in the field. Over the years, Technology Solutions has played an absolutely vital role in architecting and laying the foundation for a strong IT infrastructure for their customers. With a growing number of businesses beginning to invest more heavily in best practices, mastermind groups and professional development, it’s no secret that the organization which has been committed to personal and professional growth for the past couple decades is already leagues ahead of their competition.
